

**PART 3840—NATURE AND CLASSES
OF MINING CLAIMS****Subpart 3840—Types of Claims**

Sec.

3840.1 Classes of mining claims.

Subpart 3841—Lode Claims

3841.1 Lodes located previous to May 10, 1872.

3841.2 Lodes must not have been adversely claimed.

3841.3 Discovery.

3841.3-1 Discovery required before location.

3841.3-2 Discovery work.

3841.4 Describing locations.

3841.4-1 Length of lode claims.

3841.4-2 Width of lode claims.

3841.4-3 Extent of surface ground.

3841.4-4 Defining of locations.

3841.4-5 Location notice; monumenting.

3841.4-6 Recording of location notice.

Subpart 3842—Placer Claims

3842.1 Placer claims: General.

3842.1-1 Discovery.

3842.1-2 Maximum allowable acreage.

3842.1-3 Locations authorized in 10-acre units.

3842.1-4 Manner of describing 10-acre units.

3842.1-5 Conformity of placer claims to the public land surveys.

3842.2 Building-stone placers.

3842.3 Saline placers.

3842.4 Petroleum placers.

Subpart 3843—Tunnel Sites

3843.1 Possessory right of tunnel proprietor.

3843.2 Location of tunnel claims.

3843.3 Recording of notices.

Subpart 3844—Millsites

3844.0-3 Authority.

3844.1 Required use.

Subpart 3840—Types of Claims**§ 3840.1 Classes of mining claims.**

Mining claims are of two distinct classes: lode claims and placers.

[35 FR 9750, June 13, 1970]

Subpart 3841—Lode Claims

SOURCE: 35 FR 9750, June 13, 1970, unless otherwise noted.

§ 3841.1 Lodes located previous to May 10, 1872.

The status of lode claims located or patented previous to May 10, 1872, is not changed with regard to their extent along the lode or width of surface; but the claim is enlarged by 2322 and 2328, R.S. (30 U.S.C. 26, 33), by investing the locator, his heirs or assigns, with the right to follow, upon the conditions stated therein, all veins, lodes, or ledges, the top or apex of which lies inside of the surface lines of his claim.

§ 3841.2 Lodes must not have been adversely claimed.

It is to be distinctly understood that the law limits the possessory right to veins, lodes, or ledges, other than the one named in the original location, to such as were not adversely claimed on May 10, 1872, and that where such other vein or ledge was so adversely claimed at that date the right of the party so adversely claiming is in no way impaired by the act of that date.

§ 3841.3 Discovery.**§ 3841.3-1 Discovery required before location.**

No lode claim shall be located until after the discovery of a vein or lode within the limits of the claim, the object of which provision is evidently to prevent the appropriation of presumed mineral ground for speculative purposes, to the exclusion of bona fide prospectors, before sufficient work has been done to determine whether a vein or lode really exists.

§ 3841.3-2 Discovery work.

The claimant should, therefore, prior to locating his claim, unless the vein can be traced upon the surface, sink a shaft or run a tunnel or drift to a sufficient depth therein to discover and develop a mineral-bearing vein, lode, or crevice; should determine, if possible, the general course of such vein in either direction from the point of discovery, by which direction he will be governed in marking the boundaries of his claim on the surface.

§ 3841.4 Describing locations.**§ 3841.4–1 Length of lode claims.**

From and after May 10, 1872, any person who is a citizen of the United States, or who has declared his intention to become a citizen, may locate, record, and hold a mining claim of 1,500 linear feet along the course of any mineral vein or lode subject to location; or an association of persons, severally qualified as above, may make joint location of such claim of 1,500 feet, but in no event can a location of a vein or lode made after May 10, 1872, exceed 1,500 feet along the course thereof, whatever may be the number of persons composing the association.

§ 3841.4–2 Width of lode claims.

No lode located after May 10, 1872, can exceed a parallelogram 1,500 feet in length by 600 feet in width, but whether surface ground of that width can be taken depends upon the local regulations or State or Territorial laws in force in the several mining districts. No such local regulations or State or Territorial laws shall limit a vein or lode claim to less than 1,500 feet along the course thereof, whether the location is made by one or more persons, nor can surface rights be limited to less than 50 feet in width unless adverse claims existing on May 10, 1872, render such lateral limitation necessary.

§ 3841.4–3 Extent of surface ground.

With regard to the extent of surface ground adjoining a vein or lode, and claimed for the convenient working thereof, the Act of May 10, 1872, provides that the lateral extent of locations of veins or lodes made after said date shall in no case exceed 300 feet on each side of the middle of the vein at the surface, and that no such surface rights shall be limited by any mining regulations to less than 25 feet on each side of the middle of the vein at the surface, except where adverse rights existing on May 10, 1872, may render such limitation necessary; the end lines of such claims to be in all cases parallel to each other. Said lateral measurements cannot extend beyond 300 feet on either side of the middle of the vein at the surface, or such dis-

tance as is allowed by local laws. For example: 400 feet cannot be taken on one side and 200 feet on the other. If, however, 300 feet on each side are allowed, and by reason of prior claims but 100 feet can be taken on one side, the locator will not be restricted to less than 300 feet on the other side; and when the locator does not determine by exploration where the middle of the vein at the surface is, his discovery shaft must be assumed to mark such point.

§ 3841.4–4 Defining of locations.

Section 5 of the Act of May 10, 1872, now section 2324, Revised Statutes (30 U.S.C. 28), requires that "the location must be distinctly marked on the ground so that its boundaries can be readily traced." Locators can not exercise too much care in defining their locations at the outset, inasmuch as section 5 of the Act of May 10, 1872 (17 Stat. 92; 30 U.S.C. 28) requires that all records of mining locations made subsequent to the date of said Act shall contain the name or names of the locators, the date of the location, and such a description of the claim or claims located, by reference to some natural object or permanent monument, as will identify the claim.

§ 3841.4–5 Location notice; monumenting.

(a) The location notice should give the course and distance as nearly as practicable from the discovery shaft on the claim to some permanent, wellknown points or objects, such, for instance, as stone monuments, blazed trees, the confluence of streams, point of intersection of well-known gulches, ravines, or roads, prominent buttes, hills, etc., which may be in the immediate vicinity, and which will serve to perpetuate and fix the locus of the claim and render it susceptible of identification from the description thereof given in the record of locations in the district, and should be duly recorded.

(b) In addition to the foregoing data, the claimant should state the names of adjoining claims, or, if none adjoin, the relative positions of the nearest claims; should drive a post or erect a monument of stones at each corner of his surface ground, and at the point of

discovery or discovery shaft should fix a post, stake, or board, upon which should be designated the name of the lode, the name or names of the locators, the number of feet claimed, and in which direction from the point of discovery, it being essential that the location notice filed for record, in addition to the foregoing description, should state whether the entire claim of 1,500 feet is taken on one side of the point of discovery, or whether it is partly upon one and partly upon the other side thereof, and in the latter case, how many feet are claimed upon each side of such discovery point. As to the importance of monuments, and as to their paramount authority, see the Act of April 28, 1904 (33 Stat. 545; 30 U.S.C. 34), which amended R.S. 2327.

§3841.4-6 Recording of location notice.

The location notice must be filed for record in all respects as required by the State or territorial laws, and local rules and regulations, if there be any.

Subpart 3842—Placer Claims

SOURCE: 35 FR 9751, June 13, 1970, unless otherwise noted.

§3842.1 Placer claims: General.

§3842.1-1 Discovery.

But one discovery of mineral is required to support a placer location, whether it be of 20 acres by an individual, or of 160 acres or less by an association of persons.

§3842.1-2 Maximum allowable acreage.

(a) By R.S. 2330 (30 U.S.C. 36), it is declared that no location of a placer claim made after July 9, 1870, shall exceed 160 acres for any one person or association of persons, which location shall conform to the United States surveys.

(b) R.S. 2331 (30 U.S.C. 35) provides that all placer-mining claims located after May 10, 1872, shall conform as nearly as practicable with the United States system of public land surveys and the rectangular subdivisions of such surveys, and such locations shall

not include more than 20 acres for each individual claimant.

(c) The foregoing provisions of law are construed to mean that after July 9, 1870, no location of a placer claim can be made to exceed 160 acres, whatever may be the number of locators associated together, or whatever the local regulations of the district may allow; and that from and after May 10, 1872, no location can exceed 20 acres for each individual participating therein; that it, a location by two persons can not exceed 40 acres, and one by three persons can not exceed 60 acres.

§3842.1-3 Locations authorized in 10-acre units.

By R.S. 2330 (30 U.S.C. 36), authority is given for subdividing 40-acre legal subdivisions into 10-acre tracts. These 10-acre tracts should be considered and dealt with as legal subdivisions, and an applicant having a placer claim which conforms to one or more of such 10-acre tracts, contiguous in case of two or more tracts, may make entry thereof, after the usual proceedings, without further survey or plat.

§3842.1-4 Manner of describing 10-acre units.

A 10-acre subdivision may be described, for instance if situated in the extreme northeast of the section, as the "NE. ¼ of the NE. ¼ of the NE. ¼" of the section, or, in like manner, by appropriate terms, wherever situated; but in addition to this description, the notice must give all the other data required in a mineral application, by which parties may be put on inquiry as to the land sought to be patented. The proofs submitted with applications must show clearly the character and extent of the improvements upon the premises.

§3842.1-5 Conformity of placer claims to the public land surveys.

(a) All placer-mining claims located after May 10, 1872, shall conform as near as practicable with the United States system of public-land surveys and the rectangular subdivisions of such surveys, whether the locations are upon surveyed or unsurveyed lands.

(b) Conformity to the public-land surveys and the rectangular subdivisions

thereof will not be required where compliance with such requirement would necessitate the placing of the lines thereof upon other prior located claims or where the claim is surrounded by prior locations.

(c) Where a placer location by one or two persons can be entirely included within a square 40-acre tract, by three or four persons within two square 40-acre tracts placed end to end, by five or six persons within three square 40-acre tracts, and by seven or eight persons within four square 40-acre tracts, such locations will be regarded as within the requirements where strict conformity is impracticable.

(d) Whether a placer location conforms reasonably with the legal subdivisions of the public survey is a question of fact to be determined in each case, and no location will be passed to patent without satisfactory evidence in this regard. Claimants should bear in mind that it is the policy of the Government to have all entries whether of agricultural or mineral lands as compact and regular in form as reasonably practicable, and that it will not permit or sanction entries or locations which cut the public domain into long narrow strips or grossly irregular or fantastically shaped tracts. (Snow Flake Fraction Placer, 37 L.D. 250.)

§ 3842.2 Building-stone placers.

The Act of August 4, 1892 (27 Stat. 348; 30 U.S.C. 161), extends the mineral land laws so as to bring lands chiefly valuable for building stone within the provisions of said laws.

(a) Common varieties of building stone are, since the Act of July 23, 1955 (69 Stat. 367; 30 U.S.C. 611) no longer locatable under the mining laws.

(b) Uncommon varieties of building stone continue to be subject to the building stone placer supplement to the mining law, 30 U.S.C. 161.

§ 3842.3 Saline placers.

(a) Under the Act approved January 31, 1901 (31 Stat. 745; 30 U.S.C. 162), extending the mining laws to saline lands, the provisions of the law relating to placer-mining claims are extended to all States so as to permit the location and purchase thereunder of all unoccupied public lands containing

salt springs, or deposits of salt in any form, and chiefly valuable therefor, with the proviso, "That the same person shall not locate or enter more than one claim hereunder." The saline placer act was superseded by the Mineral Leasing Act of February 25, 1920 (41 Stat. 437; 30 U.S.C. 181 *et seq.*), whereby saline (sodium) deposits were made subject to disposal by leases instead of mining locations.

(b) Rights obtained by location under the placer-mining laws are assignable, and the assignee may make the entry in his own name; so, under this act a person holding as assignee may make entry in his own name: *Provided*, That he has not held under this act, at any time, either as locator or entryman, any other lands; his right is exhausted by having held under this act any particular tract, either as locator or entryman, either as an individual or as a member of an association. It follows, therefore, that no application for patent or entry, made under this act, shall embrace more than one single location.

(c) In order that the conditions imposed by the proviso, as set forth in paragraph (b) of this section, may duly appear, the application for patent must contain or be accompanied by a specific statement by each person whose name appears therein that he never has, either as an individual or as a member of an association, located or entered any other lands under the provisions of this act. The application for patent should also be accompanied by a showing, fully disclosing the qualifications as defined by the proviso, of the applicants' predecessors in interest.

§ 3842.4 Petroleum placers.

The Act of February 11, 1897 (29 Stat. 526), provides for the location and entry of public lands chiefly valuable for petroleum or other mineral oils, and entries of that nature made prior to the passage of said act are to be considered as though made thereunder. This Act was superseded by the Mineral Leasing Act of February 25, 1920 (41 Stat. 437).

Subpart 3843—Tunnel Sites

SOURCE: 35 FR 9752, June 13, 1970, unless otherwise noted.

§ 3843.1 Possessory right of tunnel proprietor.

The effect of R.S. 2323 (30 U.S.C. 27), is to give the proprietors of a mining tunnel run in good faith the possessory right to 1,500 feet of any blind lodes cut, discovered, or intersected by such tunnel, which were not previously known to exist within 3,000 feet from the face or point of commencement of such tunnel, and to prohibit other parties, after the commencement of the tunnel, from prospecting for and making locations of lodes on the line thereof and within said distance of 3,000 feet, unless such lodes appear upon the surface or were previously known to exist. The term "face," as used in said sections, is construed and held to mean the first working face formed in the tunnel, and to signify the point at which the tunnel actually enters cover; it being from this point that the 3,000 feet are to be counted upon which prospecting is prohibited as aforesaid. R.S. 2323 provides: "Failure to prosecute the work on the tunnel for six months shall be considered as an abandonment of the right to all undiscovered veins on the line of such tunnel."

§ 3843.2 Location of tunnel claims.

To avail themselves of the benefits of this provision of law, the proprietors of a mining tunnel will be required, at the time they enter cover as aforesaid, to give proper notice of their tunnel location by erecting a substantial post, board, or monument at the face or point of commencement thereof, upon which should be posted a good and sufficient notice, giving the names of the parties or company claiming the tunnel right; the actual or proposed course or direction of the tunnel, the height and width thereof, and the course and distance from such face or point of commencement to some permanent well-known objects in the vicinity by which to fix and determine the locus in manner heretofore set forth applicable to locations of veins or lodes, and at the time of posting such notice they shall, in order that miners or prospectors may be enabled to determine whether or not they are within the lines of the tunnel, establish the boundary lines thereof, by stakes or

monuments placed along such lines at proper intervals, to the terminus of the 3,000 feet from the face or point of commencement of the tunnel, and the lines so marked will define and govern as to specific boundaries within which prospecting for lodes not previously known to exist is prohibited while work on the tunnel is being prosecuted with reasonable diligence.

§ 3843.3 Recording of notices.

A full and correct copy of such notice of location defining the tunnel claim must be filed for record with the mining recorder of the district, to which notice must be attached the sworn statement or declaration of the owners, claimants, or projectors of such tunnel, setting forth the facts in the case; stating the amount expended by themselves and their predecessors in interest in prosecuting work thereon; the extent of the work performed, and that it is bona fide their intention to prosecute work on the tunnel so located and described with reasonable diligence for the development of a vein or lode, or for the discovery of mines, or both, as the case may be. This notice of location must be duly recorded, and, with the said sworn statement attached, kept on the recorder's files for future reference.

Subpart 3844—Millsites**§ 3844.0-3 Authority.**

The location and patenting of lands for millsite purposes is authorized by R.S. 2337 as amended by the Act of March 18, 1960. The Act, 30 U.S.C. 42, reads as follows:

Patents for nonmineral lands.

(a) Where nonmineral land not contiguous to the vein or lode is used or occupied by the proprietor of such vein or lode for mining or milling purposes, such nonadjacent surface ground may be embraced, and included in an application for a patent for such vein or lode, and the same may be patented therewith, subject to the same preliminary requirements as to survey and notice as are applicable to veins or lodes; but no location made of such nonadjacent land shall exceed five acres, and payment for the same must be made at the same rate as fixed by sections 21-24, 26-28, 29, 30, 33-48, 50-52, and 71-76 of this title for the superficies of the lode. The owner of a quartz mill or reduction works,

§ 3844.1

not owning a mine in connection therewith, may also receive a patent for his mill site, as provided in this section.

(b) Where nonmineral land is needed by the proprietor of a placer claim for mining, milling, processing, beneficiation, or other operations in connection with such claim, and is used or occupied by the proprietor for such purposes, such land may be included in an application for a patent for such claim, and may be patented therewith subject to the same requirements as to survey and notice as are applicable to placers. No location made of such nonmineral land shall exceed five acres and payment for the same shall be made at the rate applicable to placer claims which do not include a vein or lode. (As amended Mar. 18, 1960, Pub. Law 86-390, 74 Stat. 7.)

[35 FR 9752, June 13, 1970]

§ 3844.1 Required use.

A millsite is required to be used or occupied distinctly and explicitly for mining or milling purposes in connection with the lode or placer claim with which it is associated. A custom or independent millsite may be located for the erection and maintenance of a quartz mill or reduction works.

[35 FR 9752, June 13, 1970]

PART 3850—ASSESSMENT WORK

Sec.

3850.0-1 Purpose.

3850.0-9 Information collection.

Subpart 3851—Assessment Work: General

3851.1 Assessment work requirements.

3851.2 Inclusion of surveys in assessment work.

3851.3 Effect of failure to perform assessment work.

3851.4 Failure of a co-owner to contribute to annual assessment work; or to the payment of maintenance fees.

3851.5 Assessment work not required after allowance of mineral entry.

3851.6 Assessment work not required for active duty military personnel.

Subpart 3852—Deferment of Assessment Work

3852.0-3 Authority.

3852.1 Conditions under which deferment may be granted.

3852.2 Filing of petition for deferment, contents.

3852.3 Notice of action on petition to be recorded.

43 CFR Ch. II (10-1-98 Edition)

3852.4 Period for which deferment may be granted.

3852.5 When deferred assessment work is to be done.

AUTHORITY: 30 U.S.C. 22 *et seq.*; 30 U.S.C. 28-28k; 50 U.S.C. Appendix 565; 107 Stat. 405.

§ 3850.0-1 Purpose.

The purpose of this part is to recite the requirements of the General Mining Law of 1872, as amended, for the performance of assessment work; to identify the methods provided by statute for qualifying assessment work; to provide for the deferment or suspension of assessment work under certain conditions; and to advise the claimant of the consequences of failing to perform the work.

[58 FR 38202, July 15, 1993]

§ 3850.0-9 Information collection.

(a) The collections of information contained in part 3850 have been approved by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.* and assigned clearance number 1004-0104 and subsequently consolidated with 1004-0114. The information will be used to allow the BLM to process petitions for the deferment of assessment work, determine if the assessment work required by statute (30 U.S.C. 28-28(e)) was indeed performed, and to determine the ownership of a mining claim or site in cases of delinquency of co-owners under 30 U.S.C. 28. A response is required to obtain a benefit in accordance with Section 2324 of the Revised Statutes, as amended (30 U.S.C. 28-28(e)) and 43 CFR part 3850.

(b) Public reporting burden for this information is estimated to average 8 minutes per response, including time for reviewing instructions, searching existing records, gathering and maintaining the data collected, and completing and reviewing the information collected. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden; to the Information Collection Clearance Officer (783), Bureau of Land
